

Afiq Hazim bin Hairul Mazhan

Dreaming to create some things that can bring happiness and joy to people is becoming a reality. Creating an IT product not only brings challenges to the me but also gives an opportunity to learn more about it. From a young age, the sense of motivation and passion always keeps me driving forward. Whether exploring unique opportunities, learning additional skills, or meeting new people, I bring these values to every experience throughout my life on a personal and professional level.
